 yellow. Crop contained one large
 contained remains of lizards, hair
 Skull of mammal preserved.

Note. — "Granaecalus (Caterpillar
shrike): a dark slaty bird, with black
wings and tail. Bird larger than a Robin.
This Granaecalus is a member of
the family, Campephagidae, all the
species of which have the feathers
of the rump stiffened — that is the
shafts are stiff. Another member
of the family is Lalage, leucotis,
a gray, white, and black bird — size of
a small Shrike, of which you got
Nos. 13044, 13048-9, + 13067."
